

SCALE

SCIENTIFIC COMMUNICATION + AI
LITERACY EXPERIENCE

CENTRAL CONNECTICUT STATE UNIVERSITY · CENTRAL WORKFORCE AND INNOVATION
HUB

Host a SCALE micro-intern.

SCALE — Scientific Communication + AI Literacy Experience

FUNDED 2026 · \$75,000 TTA 3.0 INNOVATION GRANT · BHEF · NEBHE · CT OFFICE OF WORKFORCE STRATEGY

LEAD HOST PARTNER: NEW BRITAIN PUBLIC LIBRARY · LEAD SECTOR PARTNER: CT HUMANITIES

Send us a project and we'll send you a student who can **check a vendor's claims against the evidence**, trace an AI-generated report back to its sources, translate technical material for a non-specialist audience, and tell you plainly what is still unresolved — with no HR paperwork on your end.

THE GAP EMPLOYERS KEEP DESCRIBING Early-career hires retrieve information quickly; judging whether it holds up — and saying so clearly to someone who has to decide — is where they struggle, and fluent, unverified AI output has widened that gap.

WHAT A SCALE STUDENT IS TRAINED TO DO

Evaluate evidence across disciplines

Reads a vendor white paper, clinical summary, or consultant report and separates what the data supports from what is merely asserted.

Interrogate AI output

Traces each claim in a generated report or draft back to a primary source and documents what was invented, missed, or overstated.

Cross the expert-to-public boundary

Turns approved technical material into board, client, or public-facing communication without flattening the uncertainty.

Report with calibrated confidence

Delivers a one-page brief a busy manager can act on, each claim marked by how well it is established.

Placements are earned: the top 20 of up to 40 students, by double-scored capstone, get the summer placements — you host someone who has already done this work independently.

SCOPE, STATED PLAINLY. Students do not perform discipline-specific technical analysis — no design, estimating, testing, clinical interpretation, or professional judgment. They verify and communicate work your experts produce and sign off on.

WHAT YOU PROVIDE

- A real project scoped to **20–25 hours**
- One point of contact for brief weekly check-ins
- A **\$500 wage match**, matched 1:1 by the grant
- Attendance at the **April 2027 scoping convening**
- Brief feedback when the project wraps

WHAT YOU GET BACK

- 20–25 hours of verification and communication work
- **CCSU is employer of record** — no payroll, onboarding, or timesheets
- Coordination by the **Central Workforce and Innovation Hub**
- A 25-hour look at a candidate before any hiring decision
- Recognition as a state-backed workforce partner

Your cost \$500 · student stipend \$1,000

FALL 2026

Partner recruitment and project scoping conversations

SPRING 2027

Translational Literacy in Science — 3 credits, up to 40 students

APRIL 2027

Employer convening — projects defined and matched

SUMMER 2027

Paid micro-internships — 20–25 hours each

Evidence, weighed. Every deliverable closes the same way: what we know, what we don't, and what to verify next.
